

# KIREC Seoul 2019 Side Event

## Solar Energy and Agriculture

Date

2019.  
Oct. 22 (Tue)  
14:30~16:00

Venue

COEX (KIREC Seoul 2019 venue)  
Conference Room E1 (Solar)

Both power generation and agriculture need solar energy and land. Rational use of these precious natural resources is a key to sustainable development. Competing resource use can be turned into complementary or, even better, mutually beneficial use with a rational planning. Study and actual application of “Agrivoltaics (or Solar Sharing),” for instance, is rapidly gaining popularity elsewhere in the world. We will introduce the existing practices of the mixed land use of photovoltaics and agriculture and discuss its potential applications.

### Speakers

#### Mr. Seiichi YAMAMOTO

Director, Isumi Natural Energy Co.,Ltd. / Business Advisor, Japan Community Power Association

#### Dr. Takeshi MAGAMI

CEO, Chiba Ecological Energy Inc.

#### Mr. Makoto TAJIMA

Senior Research Fellow, Institute for Sustainable Energy Policies (ISEP)

#### Dr. Ibrahim TOGOLA

President, Mali-Folkecenter Nyetaa (MFC)

#### TBC

Korean Agrivoltaic Association (KAVA)

### Moderator

#### Dr. Shota FURUYA

Researcher, Institute for Sustainable Energy Policies (ISEP)

### Organizers

Institute for Sustainable Energy Policies / Mali Folkecenter
